

*Introducing*  
**GoSpeak!™**

**Ultra-Portable Amplification System in the UK**

**GoSpeak! Adds Punch to Presentations, Sales Meetings,  
Training and Teaching Seminars, Trade Show Demos and More**

Camarillo, California, February 7, 2005 --Interlink Electronics, Inc. (Nasdaq:LINK), a worldwide leader in the development of intuitive interface technologies and presentation solutions, today introduced *GoSpeak!*, a new, ultra-portable voice amplification system. Powerful enough to address audiences of 200 people, *GoSpeak!*'s flat-panel patented speaker technology provides room-filling audio amplification for presentations, sales meetings, training sessions, teaching seminars and trade shows.

“*GoSpeak!* adds voice clarity and punch to your presentations in the same way that portable projectors bring focus and impact to your visual images,” said Mr. Jim Reisteter, Vice President of Sales and Marketing, Interlink Electronics, Inc. “Both words and slides work together in effective presentations, but in crowded meeting rooms or outdoors, it’s the audio, or voice reinforcement, that is often overlooked.

Portable systems claiming to be portable are often heavy, bulky and too technically challenging for the presenter to use easily in these situations. *GoSpeak!* weighs less than 2.7 kg, slips into a laptop-sized bag, sets up in seconds and provides voice amplification to enhance your presentation.

“*GoSpeak!* is designed for corporate presenters, professional speakers, trainers, educators, facilities managers and field professionals, adds Interlink’s Mr. Reisteter. “We surveyed people who present to get their recommendation on how best to use audio during presentations. The result was *GoSpeak!* - the premier audio presentation product from Interlink Electronics, it will be marketed through our distribution and reseller channels in the UK as well as through our global

online store. For presentations or training seminars to audiences of more than 10 people, *GoSpeak!* is as powerful communication tool.

### **About *GoSpeak!***

*GoSpeak!* is a ultra-portable personal amplification system. It is compatible with today's leading wired and wireless microphone systems including those from Audio Technica and Azden, as well as other high impedance dynamic microphones. *GoSpeak!* is ultra-portable (weighing less than 2.7 kg and measuring about 48cm x 31cm x 10cm). It's also powerful (with dual flat-panel speakers providing 40 watts of amplification). When even greater amplification is required, multiple *GoSpeak!* systems can be daisy-chained to provide PA coverage for auditoriums and very large meeting rooms. Microphone input, stereo line input and stereo line output are provided using 1/8" mini phone jack connections.

*GoSpeak!* (VP3350) has a manufacturer's suggested list price of £ 209 (excluding VAT) and will be available in the UK starting in March 2005. *GoSpeak!* is available in the United Kingdom from Insight UK ( <http://uk.insight.com/index.php> ), or directly from the Interlink Electronics' global online store at [www.interlinkstore.com/](http://www.interlinkstore.com/). A one-year limited warranty and toll-free technical support are included. See *GoSpeak!* online at [www.gospeaklink.com/](http://www.gospeaklink.com/).

### **About Interlink Electronics, Inc.**
