

Introducing

RemotePoint[®] Navigator 2.4 in the United Kingdom

**New Remote Control Makes You Look Great
And Your PowerPoint[®] Presentations Appear Effortless!**

Camarillo, California, March 29, 2004 --Interlink Electronics, Inc. (Nasdaq:LINK), the world leader in the development of intuitive interface solutions and technologies for business and home applications, today announced availability of *RemotePoint Navigator 2.4 in the United Kingdom*. The next generation of PC-based remote controls, *Navigator 2.4* puts you in immediate command of your PowerPoint presentations. It's 2.4 GHz RF wireless technology guarantees that, no matter where you're standing in the room or which way your facing, your presentation slides will advance on cue—every time. Navigator's built-in laser pointer also let's you focus in on the fine points.

"Of the 400 million registered PowerPoint users worldwide, most have never used a PC remote control to make their presentations," said Jim Reisteter, Vice President of Marketing and Sales, Interlink Electronics, Inc. "Many still consider wireless remote controls too challenging for the average presenter to install and use. Designed specifically for PowerPoint, *Navigator 2.4* makes slide presentations easier right out of the box.

Its ergonomic shape rests comfortably in the palm of your hand. Large icon-studded arrow keys advance, reverse or hide your slides with just a click. Installation? Just plug in the USB receiver and go. That's it!"

About RemotePoint Navigator

RemotePoint Navigator is possibly the presentation industry's most ergonomically perfect PC remote control. Designed for the mobile professional, Its polished metal, icon-studded control keys support the slide functions most used by today's PowerPoint users: **Slide Forward, Slide Back, Slide Hide** and **Laser Pointer**. Using 2.4 GHz radio frequency (RF) wireless, Navigator 2.4 gives you up to 15 meters of unrestricted freedom—freedom to be more interactive with your audience and more effective in your presentations.

RemotePoint Navigator is a USB input device designed for IBM PCs and compatibles running Windows XP/2000/98 and Me, and Mac G3 and G4 platforms running OS 8.x, 9.x and X. Available in the United Kingdom through selected resellers starting April 2004, RemotePoint Navigator 2.4 has a manufacturer's suggested list price £ 119.
