

Introducing

RemotePoint[®] Navigator 2.4

**A New Remote Control That Makes You Look Great,
And Your PowerPoint[®] Presentations Appear Effortless!**

Camarillo, California, March 29th, 2004 --Interlink Electronics, Inc. (Nasdaq:LINK), the world leader in the development of intuitive interface solutions and technologies for business and home applications, today announced the *RemotePoint Navigator 2.4*—the next generation of ergonomically styled PC-based remote controls. With its polished metal top-case and tactile control icons, *Navigator 2.4* puts you in immediate command of your PowerPoint presentations. It's 2.4 mHz RF wireless technology guarantees that, no matter where you're standing in the room or which way your facing, your slides will advance on cue—every time. Navigator's built-in laser pointer also let's you effortlessly focus in on the fine points.

"Of the 400 million registered PowerPoint users worldwide, most have never used a PC remote control to make their presentations," said Jim Reisteter, Vice President of Marketing and Sales, Interlink Electronics, Inc. "Many still consider wireless remote controls too challenging or risky for the average user to install and use. Designed specifically for PowerPoint, *Navigator 2.4* makes slide presentations easier right out of the box.
